### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with S. Peter Ludwig on 10/27/05.

The application has been amended as follows:

#### **IN THE CLAIMS:**

Claim 3, line 4, "address" has been changed to --addresses--.

Claim 14, line 2, --digital processing-- has been inserted after second.

Claim 15, line 12, --digital processing-- has been inserted after second; line 14, -- at least-- has been inserted before "first"; line 14, --digital processing-- has been inserted after second.

Claim 21, line 4, "address" has been changed to --addresses--.

Claim 37 has been amended as follow:

--37. (Amended) An interpolation device for processing a sequence of input samples provided at a given input period, and having an output period that is substantially independent of the input period, the device comprising:

a finite impulse response (FIR) filter, adapted to process the input samples so as to generate a sequence of intermediate results in the filter at successive times corresponding to the output period, and to update the intermediate results for each of the input samples, and to output as an output sample, once in each output period, the intermediate result that was generated at an earliest one of the successive times among the intermediate results in the filter;

a timing controller, which is coupled to determine a fractional interval indicative of a phase offset between the input period and the output period, wherein the filter generates and updates the intermediate results responsive to the fractional interval determined by the timing controller.—

Claim 38 has been canceled.

Claim 39 has been amended as follow:

--39. (Amended) A method for filtering a sequence of input samples provided at a given input period, comprising:

processing the input samples in a finite impulse response (FIR) filter so as to generate a sequence of intermediate results in the filter at successive times corresponding to an output period of the filter, which is substantially independent of the input period;

updating the intermediate results for each of the input samples;

and outputting as an output sample, once in each output period, the intermediate result that was generated at an earliest one of the successive times among the intermediate results in the filter;

determining a fractional interval indicative of a phase offset between the input period and the output period, wherein processing and updating the intermediate results comprises computing the intermediate results responsive to the fractional interval.--

Claim 40 has been canceled.

#### **Reasons for allowance**

2. The following is an examiner's statement of reasons for allowance: an interpolation method and apparatus and a multichannel apparatus and method are disclosed. The closest prior art, De La Bourdonnaye, US Patent No. 5,212,687 and Snell US patent No. 5,764,113, disclose similar method and apparatus. However, De La Bourdonnaye and Snell do not teach or fairly suggest the limitations recited in claim 1, lines 7-16 and similar limitations recited in claim 19, the limitations of "a timing controller, which is coupled to determine a fractional interval indicative of a phase offset **between the input period and the output period**, wherein the filter generates and updates the intermediate results responsive to the fractional interval determined by the timing controller" recited in claim 37 and similar limitations recited in claim 39, are neither anticipated nor rendered obvious by De La Bourdonnaye and Snell.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
